Nina Krockow - Doing Business in Germany

A successful international business strategy using the ENTER method

ECONOMY | ENTREPRENEURSHIP | MARKETING

Doing business with Germany offers enormous opportunities, if you have a better understanding of the Germans. If you want to do business with them, you will find that they have a different culture than the rest of Europe. This leads to misunderstandings and an unnecessary amount of failed deals.

If you want to be successful in doing business with the Germans, you need to comply with the demands of your German business partners and their consumers. Many companies sell products and services at their national standards, but that is not what the German expect. They are counting on Made for Germany – good isn't good enough, they want excellence.

This books offers insight into the world of German managers, entrepreneurs, and consumers, and describes five practical steps with which you can do business in Germany successfully. The ENTER method

offers the opportunity to open the doors to one of the strongest economies of Europe and a sales market of over eighty million consumers.
